https://github.com/agueroda2004

Full-Stack Software Engineer specializing in the development of scalable web applications using React, TypeScript, and Node.js. Experienced in building business-critical solutions for agricultural management, animal health monitoring, and e-commerce, transforming manual processes into centralized, data-driven systems. Focused on software architecture, security, automated testing, and delivering high-quality user experiences.

TECHNICAL SKILLS

Programming Languages: Java, C#, Python, TypeScript, JavaScript
Frontend: React, Angular, Tailwind, Nextjs, TanStack Query, Zustand
Backend: Node.js, Express, .NET, FastAPI, Spring
Databases: MySQL, PostgreSQL (Neon), SQL, NoSQL Patterns, Prisma ORM
Cloud & Deployment: Vercel, Railway, Supabase, Appwrite
Testing & Quality: Unit Testing, Integration Testing, Vitest, Zod, Sentry
Tools & Practices: Git, GitHub, CI/CD, GenAI Productivity Tools (LLM Agents), OpenCode

FREELANCE SOFTWARE DEVELOPMENT

Livestock & Farm Management Platform / Livestockpro / ***May 2026 – June 2026***
www.livestockpro.com
Full-Stack Developer

- **Owned the full development lifecycle of a scalable livestock management platform**, designing cloud-native backend services and responsive frontends utilizing React, TypeScript, Express, and MySQL.
- **Designed and implemented a scalable architecture** based on **dependency injection** and layered separation (**Routes → Middlewares → Controllers → Services → Database**), improving maintainability, extensibility, and system decoupling.
- **Implemented role-based access control (RBAC)**, **JWT authentication**, and route protection across both frontend and backend applications, ensuring secure access to critical business operations.
- **Built interactive dashboards and analytical reports** featuring advanced filters, financial metrics, and data visualizations to monitor livestock inventory, expenses, revenue, and net profit in real time.
- **Drove system quality and operational excellence by implementing 200+ automated unit and integration tests**, practicing CI/CD principles, and managing production deployments.

Sneakers Catalog / Tenis Fresonas / ***February 2026 – March 2026***
tenisfresonas.com
Full-Stack Developer

- **Designed and developed a full-stack product catalog application** using **React, JavaScript, and Supabase**, centralizing the management and visualization of **200+ products** while eliminating the need to manually share thousands of product photos with customers.
- **Implemented a comprehensive administrative panel** featuring **secure authentication**, product, category, and subcategory management, as well as **advanced search, filtering, and pagination**, improving product discovery for end users.
- **Optimized system performance and maintainability** through **client-side image compression**, **error monitoring with Sentry**, and **comprehensive code documentation**, helping support **20,000+ monthly requests** while delivering a **responsive and reliable user experience**.

Swine Mortality Management System / PostDestete ***December 2025 – January 2026***

Full-Stack Developer

- **Developed a swine mortality analytics platform** for a farm with **2,000+ animals**, centralizing the tracking and management of health-related events to support **data-driven decision-making**.
- **Implemented interactive dashboards and analytical visualizations** using **React, TypeScript, and Chart.js**, enabling users to identify mortality trends by disease, location, feed type, and time period through **advanced filtering and real-time metrics**.
- **Designed a secure and scalable system** featuring **JWT-based authentication**, **role-based access control (RBAC)**, **automatic session renewal with Refresh Tokens**, and deployment through **Vercel Serverless Functions**, while adhering to **SOLID principles** and maintaining **comprehensive code documentation**.

PERSONAL PROJECTS

E-commerce / CoolStreet ***August 2025 – November 2025***
Full-Stack Developer

- **Developed a full-stack e-commerce platform** using **Angular, TypeScript, Express, Prisma, and MySQL**, implementing product, promotion, user, and order management, along with authentication for both customers and administrators.
- **Designed and optimized complex data access patterns and relational structures** to handle multi-attribute product variants, ratings, and end-to-end lifecycle tracking.
- **Built analytical modules and business reports** to monitor sales performance, best-selling products, most popular categories and tags, combining key business metrics with **data visualizations to support decision-making**.

EDUCATION

Technical University of Costa Rica (Universidad Técnica Nacional) **Alajuela, Costa Rica**
Bachelor's Degree in Software Engineering *January 2023 – April 2026*

Professional Technical High School of Puriscal (Colegio Técnico Profesional de Puriscal) **Puriscal, Costa Rica**
January 2017 – December 2022
High School Diploma

LANGUAGES

- Spanish — Native
- English — B2 (EF SET Certified)
